Result: **Normal**

Registered Name: **Ringsides Pricilla**

Reg#: **WS28995405**

Test Results: Homozygous Normal

Risk for Developing Dominant PRA: This dog will never develop Dominant PRA.

Significance for Breeding: This dog has two normal PRA gene copies (Homozygous Normal). It will pass only the normal gene to its offspring. It should be bred only to Homozygous Normal dogs in order to prevent new cases of Dominant PRA-affected offspring.

This interpretation is based on the test result of the DNA test for the specific mutation identified as causing Dominant PRA in Old English Mastiffs as of the date on this report.
